STATEMENT OF INTEREST OF *AMICI CURIAE*¹

Amicus American Council on Education (ACE) is joined on this amicus brief in support of Harvard University by 22 associations of colleges, universities, educators, trustees, and other representatives of American higher education. A list of all *amici* is in the addendum to this brief. *Amici*, whose members include public, independent, large, small, urban, rural, denominational, non-denominational, graduate, and undergraduate institutions throughout the United States, submit this brief to explain how the Administration’s actions against Harvard threaten the autonomy of institutions throughout American higher education and impose unacceptable costs on society as a whole. The District Court’s injunction should be affirmed.

ARGUMENT

The United States Supreme Court has long held that “[t]he vigilant protection of constitutional freedoms is nowhere more vital than in the community of American schools.” *Keyishian v. Board of Regents of Univ. of State of N.Y.*, 385 U.S. 589, 603 (1967). Its precedents recognize that “[t]he classroom is peculiarly ‘the marketplace of ideas.’” *Id.* The First Amendment plays a critical role in allowing that

¹ All parties have consented to the filing of this brief. This brief was authored entirely by counsel for *amici*; no party or party’s counsel contributed money intended to fund the brief’s preparation or submission; and no person other than *amici* contributed money intended to fund the brief’s preparation or submission.

marketplace to survive and thrive by protecting the autonomy of educational institutions to determine for themselves where they fit in the rich mosaic of higher education in America. Over this country’s last two and half centuries, those protections have made possible the development of a remarkable spectrum of colleges and universities—from religious schools, to community colleges, to trade schools, to small liberal arts schools, to large research institutions. “To impose any strait jacket upon” these institutions and “the vital role in a democracy” that they play “would imperil the future of our Nation.” *Id.* (quoting *Sweezy v. New Hampshire*, 354 U.S. 234, 250 (1957) (plurality op.)).

This case presents a vital test for these First Amendment principles. Over the last year, the current Administration has engaged in an unprecedented effort to coerce institutions of higher education to behave in a manner that reflects the Administration’s preferred ideology, including by reshaping their faculty, curriculum, and student body. When Harvard resisted the Administration’s unlawful demands, the Administration retaliated with extreme sanctions, including the Proclamation at issue in this appeal. The Proclamation is blunt and succinct: It prohibits any foreign national from entering the United States for the purpose of attending Harvard.

Amici are steadfast in the view that it is essential for colleges and universities to support a wide spectrum of thought. Higher education, after all, should facilitate

“that robust exchange of ideas which discovers truth out of a multitude of tongues.”

Keyishian, 385 U.S. at 603 (quotation marks omitted). When universities fall short of this ideal, they can and should be held accountable.

But that does not permit any political actor—past, present, or future—to impose by executive fiat “a pall of orthodoxy over the classroom.” *Id.* Yet that is exactly what the current Administration seeks to do at Harvard. Its actions are dangerous—not just for Harvard, and not just for higher education, but for the nation as a whole. Every American enjoys the concrete benefits that have resulted from the autonomy embedded in, and enabling the missions of, our colleges and universities. This institutional autonomy has resulted in major breakthroughs in medicine, technology, and—especially relevant to this case—the development of varied environments for higher education, from research universities to religious schools and community colleges. The whole country will bear the cost if that autonomy is dismantled.

The Administration’s actions at issue in this case are directed at Harvard, but they reverberate throughout every state in the nation. If the federal government may punish a university for its perceived ideology or that of its students, then the marketplace of ideas collapses into a monopoly of dogma. That is the antithesis of America’s constitutional values, and it jeopardizes the richness of the spectrum of higher education that has long been one of our country’s greatest strengths.

I. INSTITUTIONAL AUTONOMY IN HIGHER EDUCATION IS A BEDROCK PRINCIPLE IN AMERICAN LAW, AND IT DELIVERS CONCRETE BENEFITS FOR THE NATION.

Institutional autonomy in higher education, which is “a special concern of the First Amendment,” *Keyishian*, 385 U.S. at 602-603, includes a university’s right to “manage an academic community and evaluate teaching and scholarship free from interference by . . . units of government,” *Hosty v. Carter*, 412 F.3d 731, 736 (7th Cir. 2005) (en banc) (Easterbrook, J.). In other words, the First Amendment protects “four essential freedoms of a university—to determine for itself on academic grounds who may teach, what may be taught, how it shall be taught, and who may be admitted to study.” *Asociación de Educación Privada de Puerto Rico, Inc. v. García-Padilla*, 490 F.3d 1, 9-10 (1st Cir. 2007) (quoting *Sweezy*, 354 U.S. at 263 (Frankfurter, J., concurring)).

These freedoms are “of transcendent value to all of us.” *Id.* at 8 (quoting *Keyishian*, 385 U.S. at 603). Indeed, institutional autonomy plays a “vital role in a democracy” by ensuring “[t]eachers and students . . . remain free to inquire, to study and to evaluate, [and] to gain new maturity and understanding.” *Sweezy*, 354 U.S. at 250 (plurality op.). The “Nation’s future,” after all, requires “leaders trained through wide exposure to th[e] robust exchange of ideas,” “[rather] than through any kind of authoritative selection.” *Keyishian*, 385 U.S. at 603. By ensuring that “laws [do not] cast a pall of orthodoxy over the classroom,” institutional autonomy creates

“breathing space” for the full range of colleges and universities: secular, religious, public, private, STEM-focused, liberal-arts-focused, community colleges, and everything in between. *Id.* at 604.

As part of this rich mosaic, schools are permitted (within the bounds of law) to admit students who align with their institutional missions and priorities. STEM-focused schools may seek out STEM-focused students. Religious schools and other institutions organized around a particular set of values may admit the students who best serve their mission. Because a college campus “is peculiarly the marketplace of ideas,” *Keyishian*, 385 U.S. at 603 (quotation marks omitted), universities compete in that marketplace in part by choosing “who may be admitted to study,” *Regents of Univ. of Mich. v. Ewing*, 474 U.S. 214, 226 & n.12 (1985).

This competitive environment drives innovation and success. American universities are “obvious positive outliers in performance” because “autonomy and competition increase the inventive output” of universities. Philippe Aghion et al., *The Governance and Performance of Research Universities: Evidence from Europe and the U.S.*, Nat’l Bureau of Econ. Research, Working Paper No. 14851, at 1, 28 (Apr. 2009). America’s tradition of institutional autonomy has allowed universities to “evolve[] into creative machines unlike any other,” “cranking out information and discoveries.” Jonathan R. Cole, *The Great American University: Its Rise to Preeminence, Its Indispensable National Role, Why It Must Be Protected* 4

(PublicAffairs 2010). Indeed, independent research drives national achievement in biomedical engineering, medicine, genetics, technological development, national defense, food production, and more. *Id.* at 207-298.

The fruits of that innovation are ubiquitous and world-changing—from the engineering underlying GPS to the “algorithm for Google searches,” from MRI technology to DNA fingerprinting. *Id.* at 4. Because universities have historically been able to enroll students, hire faculty, and pursue research without fear of government backlash, they have delivered agricultural innovations, such as corn hybrids, soybean varieties, and even the Honeycrisp apple. *See* Fran O’Leary, *University Ag Innovation Hubs Under Threat*, FarmProgress (June 22, 2021).² The Department of Defense has a long history of benefitting from research projects led by universities, which can and do take on the kind of “high-risk, high-reward research projects” that the private sector often shies away from. Staff Writers, *From Campus to Combat: How University Research is Revolutionizing Defense Technology*, EnvZone (Dec. 16, 2024).³ And institutional autonomy allows faculty at religious schools to “teach and research within the parameters of the religious tradition.” Michael W. McConnell, *Academic Freedom in Religious Colleges and Universities*, 53 Law & Contemp. Probs. 303, 306 (1990).

² <https://www.farmprogress.com/technology/university-ag-innovation-hubs-under-threat>.

³ <https://perma.cc/XX26-TAD8>.

These innovations are “the *sine qua non* for [this nation’s] greatness,” Cole, *Great American University*, *supra*, at 5, and they did not fall out the sky. Rather, they are the product of a fundamental commitment to a “long tradition” of institutional autonomy. *Lieberman v. Gant*, 630 F.2d 60, 67 (2d Cir. 1980) (Friendly, J.).

It is this tradition—and the extraordinary opportunities it offers—that makes American higher education the destination of choice for students from around the world. In turn, those who come from abroad to study and research in the United States enrich and strengthen our country in innumerable ways. As the Supreme Court has explained, truth emerges “out of a multitude of tongues,” *Keyishian*, 385 U.S. at 683 (quotation marks omitted), and it is “commendable” for schools to “prepar[e] graduates to adapt to an increasingly pluralistic society” and “broaden[] and refin[e] understanding” across cultures. *Students for Fair Admissions, Inc. v. President & Fellows of Harvard Coll.*, 600 U.S. 181, 214 (2023) (quotation marks omitted). But these benefits are unattainable when schools are prohibited from enrolling international students because they do not pass the government’s ideological litmus test.

None of this makes universities and colleges beyond reproach or above the law. Universities should be receptive to thoughtful criticism and accountable when they fall short. And Congress has mandated that colleges and universities that

receive federal funding must comply with certain federal laws—including that they do not unlawfully discriminate in violation of Title VI, *see* 42 U.S.C. § 2000d. These obligations are enforceable through procedures dictated by statute and regulation, which must themselves comply with the constitutional guarantee of due process. *See, e.g.*, 42 U.S.C. §§ 2000d-1, 2000d-2; 34 C.F.R. subtit. B, pt. 100; U.S. Const. amend. V. But the Executive Branch cannot act without regard to those lawful processes. And it certainly cannot coerce a school into surrendering its core institutional rights purely because it disagrees with the perceived ideology of an institution, its faculty members, or its student body.

II. THE PROCLAMATION IS FUNDAMENTALLY INCONSISTENT WITH INSTITUTIONAL AUTONOMY—AT HARVARD AND OTHER EDUCATIONAL INSTITUTIONS ACROSS THE COUNTRY.

Last year, the Administration came to several universities, including Harvard, with a list of demands. Those demands included, among other things, commissioning a government-approved third party to “audit” the school’s staff for “viewpoint diversity,” reforming “every department or field found to lack viewpoint diversity,” revising its recruitment to promote the current Administration’s understanding of “American values,” and ending support for student groups with which the Administration did not agree. App’x 32-36.

Harvard refused. The Administration then requested that Harvard provide certain information for “each student visa holder” across Harvard’s 13 schools

within ten business days. App'x 125. Failure to do so “within the timeframe provided” would be “treated as a voluntary withdrawal” from the exchange-student visa program altogether. *Id.* Harvard did its best—gathering and providing all the information it could within ten days. *Id.*; *see* Harvard Br. 14 (describing the “competing obligations” universities must balance when “producing educational records to the government”). But the Administration stated without further explanation that the response was “insufficient,” and it revoked Harvard’s visa certification. App'x 125.

The letter announcing Harvard’s decertification is candid in confessing the Administration’s ideological motives, stating that the Administration intended “to send a clear signal to Harvard and all universities . . . that the Trump Administration will . . . root out the evils of” what it calls “anti-Americanism in society and campuses.” Kristi Noem, Sec’y, U.S. Dep’t of Homeland Sec., to Maureen Martin, Harvard Univ., *Harvard’s Student and Exchange Visitor Program Decertification* (May 22, 2025). The Administration then issued the challenged Proclamation, barring foreign students from entering the country for the specific purpose of studying at Harvard. App'x 111-112.

The Administration also targeted Harvard in other ways after Harvard refused its demands, including by freezing its federal grant funding and threatening its tax-exempt status. *See President & Fellows of Harvard Coll. v. United States Dep’t of*

Health & Human Servs., 798 F. Supp. 3d 77, 91-92 (D. Mass. 2025). It has also threatened to undermine Harvard’s patent rights for inventions funded in part by federal grants, invoking a law that has never been used for that purpose in the nearly 50 years since it was adopted. *See* Letter from Howard Lutnick to Dr. Alan M. Garber (Aug. 8, 2025)⁴; Emily G. Blevins, *Pricing & March-in Rights Under the Bayh-Dole Act*, Cong. Rsch. Serv. IF12582 (Dec. 3, 2024) (noting the Government has never attempted to exercise these powers before).⁵ In other words, the Administration sought to leverage multiple aspects of federal power to undermine Harvard’s “essential freedoms”—“who may teach, what may be taught, how it shall be taught, and who may be admitted to study.” *García-Padilla*, 490 F.3d at 9-10.

All the while, the President and Administration officials made numerous statements confirming the Administration’s motives and objective: to coerce Harvard into surrendering its institutional autonomy. At a public cabinet meeting in April 2025, Education Secretary Linda McMahon and Homeland Security Secretary Kristi Noem discussed with President Trump the funding freeze and requests for information regarding Harvard’s foreign students. The President responded, “Good . . . [t]he students they have, the professors they have, the attitude they have, is not American.” The White House, *President Trump Participates in a Cabinet Meeting*,

⁴ <https://perma.cc/4SVC-ZLWA>.

⁵ <https://www.congress.gov/crs-product/IF12582>.

YouTube, at 1:23:20-26 (Apr. 30, 2025).⁶ Secretary McMahon later reiterated this viewpoint in a TV interview, asking whether Harvard is “vetting students who are coming in from outside of the country to make sure they’re not activists? Are they vetting professors that they’re hiring to make sure that they’re not teaching ideologies, but that they’re teaching subject matter?” CNBC Television, *Education Secretary Linda McMahon to Harvard: Obey the Law and You Can Be Eligible for Funding*, YouTube, at 1:04-31 (May 7, 2025) (“CNBC Interview”).⁷ McMahon explained that because Harvard had “taken a very hard line” in refusing the Administration’s demands, the Administration “took a hard line back.” *Id.* The result has been, as Harvard aptly puts it, a steady “drumbeat of openly discriminatory investigations, record requests, and funding cut-offs.” Harvard Br. 28.

III. THE ADMINISTRATION’S RETALIATORY ACTIONS AGAINST HARVARD ARE UNCONSTITUTIONAL AND SET A DANGEROUS PRECEDENT FOR ALL INSTITUTIONS OF HIGHER EDUCATION.

The Administration’s retaliation against Harvard is unconstitutional. “[I]n case after case,” the Supreme Court “has barred the government from” efforts “to rejigger the expressive realm.” *Moody v. NetChoice, LLC*, 603 U.S. 707, 733 (2024). “However imperfect the private marketplace of ideas” might be, it is far worse for the government to decide that speech is “imbalanced” and coerce “speakers to

⁶ <https://perma.cc/H89V-3XXM>.

⁷ <https://perma.cc/E5AM-8ZSC>.

provide more of some views or less of others.” *Id.* Such viewpoint discrimination “is uniquely harmful to a free and democratic society.” *National Rifle Ass’n of Am. v. Vullo*, 602 U.S. 175, 187 (2024). And the government cannot leverage discretionary benefits to achieve these impermissible ends—that is, “a government official cannot do indirectly what she is barred from doing directly.” *Id.* at 190.

The Proclamation at issue in this appeal flouts these basic principles. Its goal is to “rejigger the expressive realm” in higher education. *Moody*, 603 U.S. at 733. The Administration sees Harvard’s students as too “activist” and its professors as invested in teaching the wrong “ideologies.” CNBC Interview. And in response to Harvard’s resistance to the Administration’s demand to vet on ideological grounds Harvard’s student body, the Administration is leveraging state power to coerce Harvard “to provide more of some views [and] less of others,” *Moody*, 603 U.S. at 733.

History teaches what lies down this path. “Scholarship cannot flourish in an atmosphere of suspicion and distrust,” and a “university ceases to be true to its own nature if it becomes the tool of . . . [the] State.” *Sweezy*, 354 U.S. at 250 (plurality op.); *Id.* at 263 (Frankfurter, J., concurring). Indeed, when educational institutions come “under the thumb of external political forces,” “[s]ound science” gives way to “unsubstantiated belief.” Cole, *Great American University*, supra, at 349. And the costs to society can be dire: Before 1933, “German universities were the best in the

world,” *id.* at 4, but now they struggle to creep into the top thirty. *See, e.g.*, Times Higher Education, *World University Rankings 2026*;⁸ Center for World Univ. Rankings, *Global 2000 List 2025 Edition*.⁹ A similar story played out in the Soviet Union, where in the 1930s the government stifled scientific advances deemed “antithetical to the state’s political ideology.” Cole, *Great American University*, *supra*, at 347-349. And in Argentina, where the government’s military junta attacked dissident Catholic seminarians in the 1970s. *See* Gustavo Morello, *The Catholic Church and Argentina’s Dirty War* 13-16 (Oxford Univ. Press 2015). Actions such as these undermine democracy itself by preventing the free exchange of ideas—both within the higher-education community and beyond it—that is essential to “our Nation’s commitment to self-government.” *Knox v. Service Emps. Int’l Union, Local 1000*, 567 U.S. 298, 308 (2012).

Even if one agrees with the current Administration’s criticisms of Harvard’s academic community, what happens when the shoe is on the other foot down the road? The pendulum of politics will inevitably swing in another direction. When it does, are colleges and universities, together with their faculty, researchers and students, forced to swing with it? A future administration might, for example, encourage universities to fire professors critical of government policy, suppress

⁸ <https://perma.cc/HQ6V-DFSC>.

⁹ <https://perma.cc/ZYQ2-JN63>.

research that contradicts government narratives, or condition government financial aid on the adoption of ideologically approved curricula. If the actions here are permissible, then it is hard to see how those actions could be distinguished.

If the Executive Branch can put Harvard on a “proclaimed governmental blacklist[],” no university is safe. *Joint Anti-Fascist Refugee Comm. v. McGrath*, 341 U.S. 123, 143-144 (1951) (Black, J., concurring). After all, relatively speaking, Harvard is fortunate. It has substantial resources to resist these incursions on its autonomy through litigation—and to withstand financial consequences in the meantime. *See, e.g.*, Higher Ed Dive, *Harvard’s Operations Lost \$112.6M in FY25 Amid Trump’s Pressure Campaign* (Oct. 17, 2025) (noting Harvard reported a \$112 million operating deficit in FY 2025, its first since the pandemic).¹⁰ But the Administration is also targeting numerous other institutions—public and private, large and small, religious and secular. *See, e.g.*, United States Dep’t of Educ., *U.S. Department of Education’s Office for Civil Rights Sends Letters to 60 Universities Under Investigation for Antisemitic Discrimination and Harassment*.¹¹ Many of these schools are not as well positioned to withstand the Administration’s punitive approach, even for a short time.

¹⁰ <https://perma.cc/4TVX-N5GX>.

¹¹ <https://perma.cc/AUK6-7VU8>.

The concern is very real, and the stakes are very high. That is why it is so important to remember and vigorously support the premise that—in *this* country—the remedy for viewpoints the government disfavors must be “more speech, not enforced silence.” *United States v. Alvarez*, 567 U.S. 709, 727-728 (2012) (quoting *Whitney v. California*, 274 U.S. 357, 377 (1927) (Brandeis, J., concurring)). It is essential for this court to reaffirm “that no official, high or petty, can prescribe what shall be orthodox” in American higher education. *West Virginia State Bd. of Educ. v. Barnette*, 319 U.S. 624, 642 (1943).

CONCLUSION

For these reasons and those in Plaintiff-Appellee’s brief, this Court should affirm.

Respectfully submitted,

ADDENDUM

The **American Council on Education (ACE)** is a membership organization that leads higher education with a united vision for the future, galvanizing its members to make change and collaborating across the sector to design solutions for today's challenges, serve the needs of a diverse student population, and shape effective public policy. As the major coordinating body for the nation's colleges and universities, its strength lies in its diverse membership of nearly 1,600 colleges and universities, related associations, and other organizations in America and abroad. ACE is the only major higher education association to represent all types of U.S. accredited, degree-granting colleges and universities.

www.acenet.edu/About/Pages/default.aspx

The **American Association of Community Colleges (AACC)** is the primary advocacy organization for the nation's community colleges. It represents the more than 1,000 regionally accredited, associate degree-granting institutions.

www.aacc.nche.edu/about-us/
