Office of International and Integrative Activities

National Science Foundation

NSF Opportunities for International Engagement

- Graduate Students

- Graduate Research Fellowships/Graduate Research Opportunities Worldwide (GROW)
- East Asia Pacific Summer Institutes
- Pan American Advanced Study Institutes
- Research Assistants on Grants/Workshops

- Undergraduate Students

- Partnerships for International Research and Education (PIRE)
- International Research Experiences for Undergraduates/IREX

Internationally Focused Research Programs

- 
- **International Collaboration in Chemistry**
 - **Materials World Network**
 - **Engineering Research Centers**
 - **Catalyzing New International Collaborations**

Programs with External Partners

- Basic Research to Enable Agricultural Development
- Dimensions in Biodiversity
- Partnerships for International Research and Education
- G8 HORCS International Funding
- Belmont Forum

Leveraging NSF Resources in an International Context

- Global Venture Fund
- Partnerships for Enhanced Engagement in Research (PEER)
- Science Across Virtual Institutes (SAVI)

NSF/European Commission Implementing Arrangement (July, 2012)

Provides opportunities for NSF-funded early career scientists and engineers to pursue research collaborations with European colleagues supported through the European Research Council (ERC) awards.
